PROFESSIONAL SUMMARY

Full-Stack Developer specializing in B2B SaaS platforms. Experienced in designing and scaling multi-tenant Laravel / Vue.js applications across backend APIs, intuitive user interfaces, and cross-platform mobile apps. Proven expertise in handling complex business domain logic—including financial workflows, payroll systems, and tax compliance—while maintaining rigorous standards for code quality and platform security.

WORK EXPERIENCE

Full-Stack Developer (Vue.js | Laravel) — Iberis

Dec 2025 – Present

Iberis Finances

- Developed and enhanced a multi-tenant B2B financial management SaaS platform using Laravel and Vue.js, covering invoicing, quotations, payments, inventory, and accounting ledger entries.
- Improved the calculation logic of financial documents to guarantee exact amount consistency and long-term data integrity.
- Implemented Tunisian accounting regulations and tax compliance rules into core document and payment workflows.
- Integrated the national e-invoicing system (TTN / El Fatoora) alongside multiple local payment gateways.
- Designed and documented RESTful APIs using Swagger within a modular Laravel architecture backed by MySQL and Redis.

Iberis RH & E-Invoice

- Built the HR platform module—including leave management, organizational hierarchy, roles, and granular permissions—and implemented payroll processing compliant with Tunisian labor legislation.
- Developed a geolocation-based time and attendance tracking mobile app using Vue.js, Ionic, and Capacitor, featuring geo-fenced work zones.
- Debugged and optimized native Android behaviors for the mobile application, including location services, device permissions, and background data synchronization.
- Hardened multi-tenant tenant isolation security and implemented automated unit tests using PHPUnit.
- Designed transactional HTML email templates for both the HR and Finance platforms.

Full-Stack Developer (Angular | Laravel) — NetAdvisor

Sep 2024 – Jul 2025

- Designed and built the Laravel 12 backend for a social platform connecting personal shoppers and clients, incorporating real-time messaging using Node.js and Socket.IO.
- Implemented a SaaS API backend solution for core business process management using a microservices architecture with an API Gateway for secure inter-service communication.
- Developed backend APIs for the Kastlo Tunisia website and constructed corresponding Angular 16 interfaces featuring clean architecture and unit testing.
- Adopted clean architecture patterns (MVC + Services) in Laravel 12, complemented by detailed Swagger API documentation.

- Implemented a JWT-based authentication and authorization system featuring middleware-level permission handling on the backend and guards/interceptors on the frontend.

Full-Stack Developer (Laravel | CodeIgniter | PHP) — **AMA Business Tunisie** May 2024 – Sep 2024

- Designed and developed an online bus subscription purchasing solution for STB Tunisia using Laravel 11 and MySQL, complete with a comprehensive management admin dashboard.
- Implemented secure online payment integration via ClickToPay to ensure seamless user transactions.
- Maintained and upgraded existing platforms built on CodeIgniter 3 and WordPress, improving overall performance, responsiveness, and UI/UX usability.

Laravel Developer (Final Year Project) — **Next Consult** Feb 2023 – Jul 2023

- Developed a specialized SaaS application for community managers using Laravel 9 and PostgreSQL.
- Integrated social media post-scheduling tools via Facebook and LinkedIn APIs to monitor social interactions and target audience demographics.
- Engineered interactive analytics dashboards and reporting features using jQuery and data visualization components.

EDUCATION

Professional Master's Degree in E-Commerce Sep 2021 – Nov 2023
Higher Institute of Management of Gabès (ISG Gabès)

Applied Bachelor's Degree in Business Information Technology Sep 2017 – Sep 2020
Higher School of Commerce of Sfax (ESC Sfax)

TECHNICAL & CORE SKILLS

Frontend & Mobile: Vue.js, Angular, Ionic, Capacitor

Backend Technologies: PHP, Laravel, Node.js

Databases: MySQL, PostgreSQL, MongoDB, Redis

APIs & Real-Time: RESTful APIs, Webhooks, Socket.IO, Swagger

Architecture & Quality: Multi-Tenant SaaS, Unit Testing (PHPUnit)

DevOps & Infrastructure: Git, GitLab CI/CD, Docker, Server Admin (Plesk)

Methodologies: Agile Development, Jira, Trello

Operating Systems: Linux, Windows

LANGUAGES

English: Professional Working Proficiency **French:** Full Professional Proficiency **Arabic:** Native / Bilingual
